Profile

Motivated and detail-oriented Frontend Software Engineer with hands-on experience in building responsive and user-friendly web applications using HTML, CSS, JavaScript, TypeScript, Tailwind and React. Passionate about creating intuitive user experiences and solving real-world problems through clean, efficient, and scalable code. Experienced in collaborative development and eager to contribute to innovative teams while continuously growing as a developer.

Education

10/2022 – 06/2026 **Bachelor's Degree**
Toshkent, Uzbekistan *Millat Umidi Univestiy* [🌐](#)

Professional Experience

- Developed dynamic and responsive web interfaces using HTML, CSS, JavaScript, and React, ensuring accessibility, responsiveness, and smooth user interactions across devices.
- Built modular components for efficient UI rendering, including navigation bars, product cards, modals, and real-time interactive elements.
- Integrated frontend applications with RESTful APIs to display dynamic data such as user profiles and product listings.
- Maintained clean and scalable code using component-based architecture and version control with Git and GitHub.

Skills

JavaScript	HTML
CSS	Responsive Design
Front-End Frameworks	C++
User Interface (UI) Design	GitHub
React.js	Frontend background, currently learning Data Analytics (SQL, Python, Excel)

Projects

Quiz App

- Developed an interactive quiz application using JavaScript and DOM manipulation to dynamically generate questions and track scores.
- Implemented a countdown timer, visual feedback for correct/incorrect answers, and question randomization.

Organic Cosmetics Website

- Built a fully responsive e-commerce-style website for natural cosmetics using Django HTML, CSS, and JavaScript.
- Designed product cards, category filters, and shopping cart UI for enhanced usability.
